## Gunsmithing

A skilled gunsmith can make a poorly performing firearm into a reliable tool, and a fine performing firearm into a work of art. Adding functionality, durability or increasing performance are all hallmarks of a fine gunsmith. Conversely, a poor gunsmith can ruin the aesthetics, decrease functionality or completely destroy the firearm. If you've invested your hard earned money into a firearm--or even trust your life to it--why would you consider taking it anywhere else?

Dave Jennings has been performing exceptional gunsmithing for over 30 years at affordable rates for customers like you and me as well as large sports outlet stores. Dave's skill isn't just recognized by his customers for his fine workmanship, but also recognized by Weatherby--a premier rifle manufacturer, as their only authorized Canadian Service Centre.
